

## THE NEW MAIN SCIENTIFIC CONTRIBUTION OF THE THESIS

1. **Name of thesis:** Reality of seafarers' working condition, health, disease structure, some occupational nature diseases and interventional solution.
2. **Speciality:** Public health
3. **Code:** 62.72.03.01
4. **Full name:** Nguyen Bao Nam
5. **Full name of supervisor:**
  1. Associate Prof. PhD. Pham Minh Khue
  2. Prof. PhD. Pham Van Thuc
6. **Educational foundation:** Haiphong University of Medicine and Pharmacy
7. **Summary of new main scientific contribution of the thesis**

This marine industry is now an important part of the economy, making great contributions to the economic development of the country. However, working on vessels, especially ocean ships, have many potential risks to the health of workers (For example, working conditions have many detrimental factors for the health of workers; the living mode, diet and resting regime are inconsequential, rarely communicate with family, land for a long time ...). Meanwhile, the research on marine labor in Vietnam is not much.

This study has shown the reality of working conditions, health, disease structure, some occupational diseases in seafarers, which can represent a community of workers at sea; The application of training intervention solutions for the seafarers so they know how to take care of and protect their health, it has practical contributions to ensuring health and improving working capacity for these seafarers. Therefore, this research is topical, necessary and of high practical significance.
