

## THE NEW MAIN SCIENTIFIC CONTRIBUTION OF THE THESIS

Name of thesis:

The situation of aquired and congenital neutropenia in children

Speciality: Pediatrics

Code : 62.72.01.35

Full name: Tran Thi Tham

Full name of supervisor:

1. Asso. Prof. Le Thi Minh Huong MD, PhD

2. Asso. Prof. Vu Van Quang MD, PhD

Educational foundation: Haiphong University of Medicine and Pharmacy

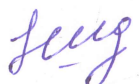

### Summary of new main scientific contribution of the thesis

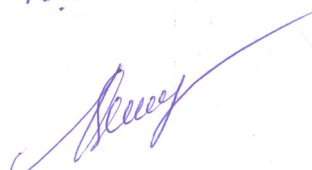

This is the first study to show the proportions and classifications of neutropenia as well as congenital neutropenia in children in our country.

The results of this thesis will contribute into diagnosis, treatment and management of patients who suffer from neutropenia in general and congenital neutropenia in particular. Besides, the study has been found the new *HAX1* gene mutation that causes congenital neutropenia. This is the novel mutation that has never reported in any article in the world.
